DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-27 and 34-40 in Paper No. 9 is acknowledged.
2. Claims 28-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27 and 40, drawn to for producing a transducer slider, classified in class 29, subclass 603.01.
 - II. Claims 34-39, drawn to a method for producing a plurality of transducer sliders, classified in class 216, subclass 22.
4. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as "sectioning the substrate into a plurality of transducer sliders". See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Louis Lu on 6/1/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
